

The Rising Cost of Birth Control is too hard to swallow..

Lower Birth Control Costs NOW!

Students are being forced to make difficult decision about staying on birth control now more than ever. In 2007, the Deficit Reduction Act (DRA) went into effect and birth control prices across the nation skyrocketed. We urge you to lower the cost of birth control on college campuses and in our communities so that we don't have to make a choice between our budget and our bodies. Please support H.R. 4054 the Prevention Through Affordable Access Act.
